

SPOT SILVER

*We recommend using it at 100% with no celloglaze to achieve the best results, as celloglaze will dull the metallic effect of the ink

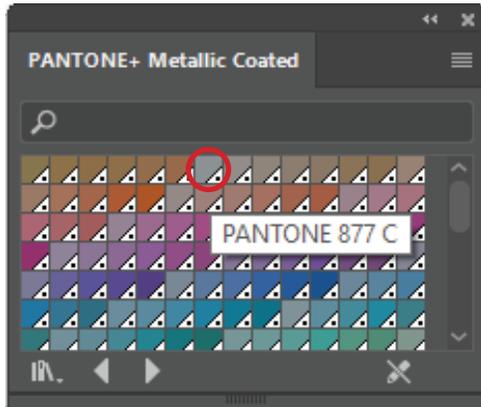

1st Select the elements of your design that need to be converted to Spot Silver

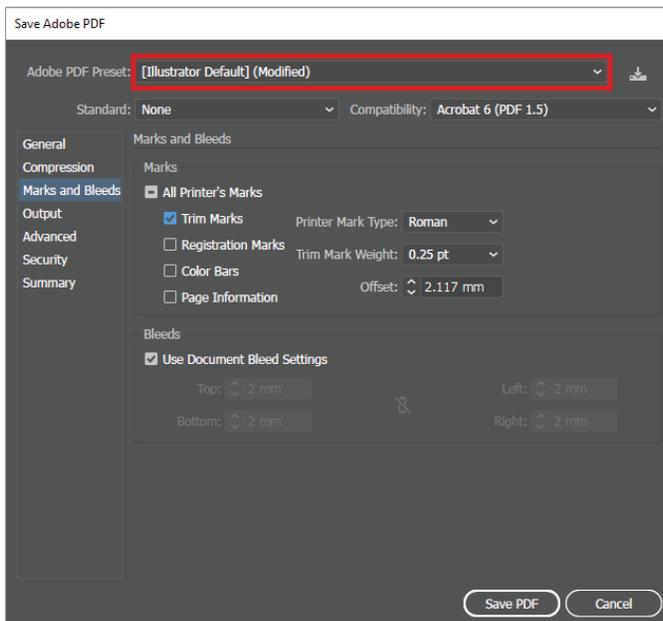

2nd Now click Window > Swatch Libraries > Colour Books > PANTONE Metallic Coated

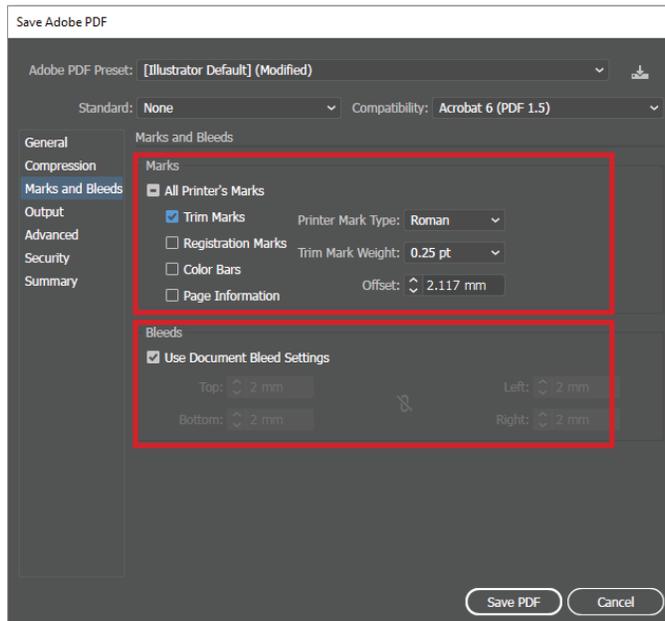

3rd Then select Pantone 877 C from the colour swatches that appear

4th Save as PDF

5th Go to Marks and Bleed Tab, check 'Trim Marks' and set the bleed to 2mm

6th In the 'Output' tab, make sure 'Colour Conversion' is set to 'No Conversion'
